Meralco Revitalizes Batangas' Modern Healthcare Facilities. Meralco, together with its beyond-the-meter subsidiary MSERV, recently signed a tripartite agreement with Batangas Medical Center for the development of a modern and state-of-the-art electrical structure which will power the healthcare institution's vision to be the leading multi-specialty center in the CALABARZON region. The project will encompass the design, supply, installation, configuration and commissioning of Batangas Medical Center's electrical system upgrade, which will eliminate sub-standard load side facilities, ensure sufficient and reliable supply, and pave the way for the completion of the hospital's new Cancer Center. During the recent ceremony held to celebrate the endeavor, Batangas Medical Center Chief Dr. Ramoncito Magnaye expressed appreciation on the collaboration, "We have made significant developments in our service because of the improvements in power source. We are very pleased that we have Meralco as a partner in our efforts to respond to the demands in healthcare." Equally appreciative, Meralco SVP and Head of Customer Retail Services Alfredo Panlilio said, "Meralco is very happy to be part of the collaborative effort with Batangas Medical Center in uplifting the lives of people in the Batangas community. We share their belief that building quality healthcare is one of the cornerstones of a robust economy, and they can count on Meralco to always deliver the best possible service."
