ORDER

On 07 February 2025, Manila Electric Company (MERALCO) filed an *Application*, dated 05 February 2025, seeking the Commission’s approval of the Annual Revenue Requirement (ARR) and Performance Incentive Scheme (PIS) for the Revised Fifth Regulatory Period (5th RP) covering Regulatory Years (RYs) 2026 to 2029, in accordance with the Rules for Setting Distribution Wheeling Rates (RDWR), as modified under Resolution No. 17, Series of 2024.

The pertinent allegations of the *Application* are hereunder quoted as follows:

1. Applicant MERALCO is a private corporation duly organized and existing under the laws of the Republic of the Philippines, with principal office located at Lopez Building, Ortigas Avenue, Barangay Ugong, Pasig City. It may be served with notices and other processes of this Honorable Commission

through its undersigned counsel at the address indicated herein.

2. Applicant has a legislative franchise to construct, operate and maintain an electric power distribution system for the conveyance of electric power to the end-users in the cities and municipalities of Metro Manila, Bulacan, Cavite and Rizal, and certain cities/municipalities/barangays in Batangas, Laguna, Quezon and Pampanga, pursuant to Republic Act No. 9209.

I. BACKGROUND

3. On 30 October 2024, this Honorable Commission issued the Order of even date, granting Applicant's Motion for Partial Reconsideration dated 27 May 2024 in ERC Case No. 2022-015, which: (a) allowed the withdrawal of the application for approval of its Annual Revenue Requirement (ARR) and Performance Incentive Scheme (PIS) for the Fifth Regulatory Period (5RP) for Regulatory Years (RYs) 2023 to 2026; and (b) directed MERALCO to re-file its 5RP Application in accordance with the rules to be adopted by the Honorable Commission.
4. On 17 December 2024, this Honorable Commission promulgated Resolution No. 17, Series of 2024, where it resolved to "APPROVE and ADOPT the *Rules Amending the Modified RDWR*", resulting in the amendment of Applicant's 5RP to cover RYs 2026 to 2029 or from 1 July 2025 to 30 June 2029. Applicant was further directed to file its new application for the 5RP within thirty (30) days from the effectivity of the Resolution.

II. THE INSTANT APPLICATION FOR THE FIFTH REGULATORY PERIOD

5. Applicant will continue operating under Performance Based Regulation (PBR), entering the revised Fifth Regulatory Period ("5RP") as part of the First Entry Group.¹ This 5RP will commence on 1 July 2025 and terminate on 30 June 2029.
6. The filing of this Application is in accordance with the Honorable Commission's revised Rules for Setting Distribution Wheeling Rates ("RDWR") for Privately Owned Distribution Utilities entering Performance Based Regulation dated 2 December 2021, as modified by ERC Resolution No. 17, Series of 2024, issued on 27 December 2024.
7. Applicant has prepared its proposal in accordance with the conditions described in the afore-mentioned RDWR, as modified, applicable rules, regulations and implementing

¹ The entry group was originally described in Annex B of ERC Resolution No. 12-02 Series of 2004 entitled, "Adopting a Methodology for Setting Distribution Wheeling Rates", dated 10 December 2004, and later amended by the Honorable Commission to provide for four entry points.

guidelines issued by the Honorable Commission. The application submitted to the Honorable Commission utilized the methodology described in the RDWR, as modified, and applied the financial spreadsheet model previously provided to the Applicant by the Honorable Commission.

8. Applicant proposes that the ARR and PIS values to be approved form the basis of the X-factor, P_o-factor and the Maximum Annual Prices (“MAP”) that will apply to Applicant and on which it will base its rate setting for the 5RP.

Proposed Annual Revenue Requirement (ARR)

9. The proposed ARR is based on the Building Block calculation² described in the RDWR, with the exclusion of corporate income tax.
10. As prescribed under the revised RDWR,³ included in the proposed ARR is an efficiency carry-over calculated in accordance with pertinent rules and regulations.
11. The proposed ARR for each RY based on the Building Block computation under the revised RDWR is set forth below:

12. The ARR is based on a proposed rolled-forward value of the Applicant’s Regulatory Asset Base (“RAB”) as described below. The opening value of the RAB for the 5RP is based on the value of the RAB as of 31 October 2024, and rolled forward using the projected Capital Expenditure (“CAPEX”) additions, depreciation and disposals from 1 November 2024 to 30 June 2025. The value of the RAB, as of 31 October 2024, is subject to review by the Independent Expert in its Report, in accordance with the Honorable Commission’s RAB Roll-

13. Several Major CAPEX Projects are tagged as “Carry-over” as they are currently ongoing and are essential for the improvement of Applicant’s operations. These projects are slated to be commissioned between RY2026 and RY2027 and formed part of the 5RP RAB computations.

- a. For purposes of the initial and subsequent annual price verification process during the 5RP as required under the revised RDWR, Applicant will update the aforementioned Consumer Price Indices and foreign exchange rates using actual values.
15. The afore-mentioned ARR is partly based on a proposed Weighted Average Cost of Capital (“WACC”) of 14.6%. Applicant’s calculations considered the recommendations of NERA Economic Consulting, Inc., a recognized and reputable global economic consulting firm which conducted a study on the matter.
16. In accordance with the revised RDWR, a proposal has been made to include assets used beyond their standard lives in the RAB at a value equivalent to five (5%) percent of their optimized replacement cost.

Capital Expenditure

17. The proposed CAPEX included in the afore-mentioned calculation of the rolled-forward RAB is as follows:

Table 5. Summary of Proposed 5RP Capital Expenditure

	Capital Expenditures per Regulatory Year (5RP)			
	(PhP)			
	RY2026	RY2027	RY2028	RY2029
Nominal Values	34,386,654,550	58,500,566,560	57,911,849,596	64,557,857,658
Nominal Values, including CWIP factor	34,990,141,389	59,492,129,847	59,034,282,798	65,779,988,238

18. The proposed CAPEX projects are necessary: (i) to augment the capacity of the network to meet demand growth or new customer requirements; to replace and refurbish aging, and obsolete assets; (ii) to relocate assets needed for the implementation of government infrastructure and third-party initiated projects; (iii) to purchase and construct non-network assets required for the normal efficient operation of the electric distribution system; (iv) to deploy automation and technology projects, including the Advanced Metering Infrastructure (AMI) Program to more than three (3) million customers, as well as innovative solutions for various electrification projects; and (v) to comply with regulatory requirements as embodied in the EPIRA, the Philippine Distribution Code, the Philippine Electrical Code, applicable international standards, and other relevant rules and regulations with emphasis on maintaining the integrity, reliability and efficiency of the electric system, and for the continuous improvement in service quality and performance measurement for the benefit of the consumers.

Operating & Maintenance Expenditure

19. The proposed Operating & Maintenance Expenditure (“OPEX”) included in the afore-mentioned calculation of the ARR is provided as follows:

Table 6. Summary of Proposed 5RP Operating & Maintenance Expenditure

	Operating & Maintenance Expenditures per Regulatory Year (5RP) (PhP)			
	Ry2026	Ry2027	Ry2028	Ry2029
Nominal Value	31,303,262,800	33,848,691,523	36,207,050,573	39,302,373,330

20. The proposed OPEX are necessary to: (i) maintain the safety, efficiency and reliability of the distribution network; (ii) support the growing asset base; (iii) allow Applicant to deliver services to its customers and support its business operations including the use of automation and digital technologies; (iv) meet the requirements of Government programs and regulations imposed on the Applicant; and (v) meet the performance targets under the Performance Incentive Scheme. The proposed OPEX will support strong growth prospects for the economy with sustained moderate growth in kWh sales throughout the 5RP. Moreover, additional OPEX is needed, not only to meet service performance levels, but also to ensure that Applicant’s reliability standards are kept at par with other power distribution utilities serving other countries in the Asian region, which are the Philippines’ competitors for direct foreign investment. Applicant has to meet customers’ increasingly more stringent requirements, particularly those customers whose output are the main drivers of our economic growth and source of export income.

Taxes other than Corporate Income Tax

21.

The proposed expenditure on Taxes, Levies & Duties (other than corporate income tax) included in the afore-mentioned calculation of the ARR is provided as follows:

Table 7. Summary of proposed 5RP Taxes, Levies & Duties (other than Corporate Income Tax) Expenditure

	Other Taxes per 5RP Regulatory Year (PhP)			
	R <y>2026</y>	R <y>2027</y>	R <y>2028</y>	R <y>2029</y>
Nominal Value	4,664,543,940	648,647,839	690,282,106	734,089,046

- a.

As provided under ERC Resolution No. 2, Series of 2021, the real property taxes for the 5RP are no longer included in the forecast and are recovered in accordance with said resolution. However, Applicant proposed to recover the real property taxes incurred and paid for the period prior to CY 2020.
- b.

The above-mentioned proposed taxes, levies & duties (other than corporate income taxes) expenditures show an increase from current levels due to new and additional impositions initiated by various local government units within Applicant’s franchise area such as for changes in the schedule of fees and other permits. The forecasts likewise considered the imposition by Local Government Units of regulatory fees on Applicant’s poles.

Regulatory Depreciation

22.

The proposed Regulatory Depreciation, which includes an allowance for assets intended to be disposed of during the 5RP, after allowing for any potential income from the sales of such disposed assets, is as shown below. The values below include depreciation both on the assets which make up Applicant’s RAB at the start of the 5RP and those that Applicant proposes to be acquired during the 5RP. Additionally, depreciation is calculated on a straight-line basis, based on the standard asset lives as approved by the Honorable Commission, where these are available.

26. The Honorable Commission will determine the actual X factor and P_o-factor after its consideration of this Application and the actual price-path after incorporating such amendments to these proposals as it may deem necessary.
27. Since the MAPs calculated under PBR are not comparable with unbundled rates, Applicant, for illustrative purposes, has prepared a comparison of its current rates for providing distribution wheeling services with those that would result from the implementation of the aforementioned estimated MAPs, which is presented below:

Proposed Performance Incentive Scheme

28. The revised RDWR prescribes the determination of a Price-Linked Performance Incentive Scheme (PIS). Under this PIS, Applicant will be rewarded if the service performance levels of its electricity distribution business exceed the target levels as proposed and will be penalized if such service performance levels fall below the proposed targets. The proposed Price-Linked PIS is based on the performance measures and performance targets shown below. Stepped performance target levels are proposed, which will influence the size of the reward or penalty.
